— PERFORMANCE

FY26 · Exceeds expectations

4.0 Excellent across the four
technical competencies assessed

FINANCE · TECHNOLOGY · AI

Finance transformation turned into *usable solutions*

Oracle EPM Cloud · Data integration · Digital tools · Applied AI

*I combine **knowledge of finance processes**, hands-on experience with enterprise systems and the ability to build the tool that is missing. I turn needs into functional structures and leave deliverables tested, documented and ready to use.*

PROFESSIONAL EXPERIENCE

Deloitte

FINANCE TRANSFORMATION · BARCELONA · JAN 2025 - PRESENT

JUL 2026
PRESENT

Finance & Technology Consultant

- Functional and technical evolution of **Oracle EPM Cloud** for planning, controlling, R&D and investments.
- Central role in the **F3M Assessment Accelerator**: functional interpretation, development, deployment and **industrialisation of new-domain onboarding**.
- **Direct client interaction** in progress meetings, and coordination with business and technology to turn finance needs into implementable solutions.
- **Technical review and support** for the work of team colleagues; improvements in automation and delivery quality, and an internal generative-AI adoption session for a team of around 15 people.

JUL 2025
JUN 2026

Finance & Technology Senior Analyst

- Functional design and implementation of **Oracle EPM Cloud** for Budget, Forecast and Actuals in R&D and investments.
- Structuring of cubes, dimensions, hierarchies and calculation rules on Essbase, including **performance tuning of two cubes: processing-time reductions of 80% and 90%**.
- Definition and validation of **around one hundred business rules** for capitalisations, depreciation and financial effects under IFRS and tax criteria.
- **Automation of the depreciation calculation**, removing manual effort equivalent to **two full-time employees**; redesign of rules and of the tax calculation process to reduce recurring errors.
- Functional coordination of integrations with SAP, ODI and EPM Automate; data validation and troubleshooting through rules, mappings and logs.
- Design of Data Forms, Task Lists, Smart View and dashboards, and authoring of the **Oracle EPM user and administration guides** delivered to the team and the client.

JAN 2025
JUN 2025

Finance & Technology Analyst

- Analysis of finance processes and translation of business needs into **functional requirements**.
- Support to the design and configuration of Oracle EPM Cloud and its documentation; validation of data, forms, rules and results.

CleverStrategy

BARCELONA · JUL 2024 - DEC 2024

JUL 2024
DEC 2024

IT Business Consultant

- **Churn prediction** algorithms and Customer Lifetime Value optimisation; a confusion-matrix calculator to estimate ROI on AI projects, and client acquisition materials.

Experience that connects

FINANCE FUNCTION · SYSTEMS · SOLUTIONS

— EDUCATION

Steinbeis University Berlin

MSc in Business and Organisational Psychology
2023 - 2025 · Grade 1.3 (A)

Universitat Pompeu Fabra

BSc in Economics
2019 - 2023 · Thesis 9.7/10

Università Milano-Bicocca

Erasmus · International Business Economics
2021 - 2022 · 29/30

— CERTIFICATIONS

Artificial intelligence

Oracle, Deloitte, Google, Anthropic and OpenAI

Oracle Cloud

EPM Data Integration, Data Platform, OCI and Guided Learning

Management and consulting

ITIL 4, project management, Scrum, Lean Six Sigma and business analysis

— CONTRIBUTIONS

Documentation

Oracle EPM user and administration guides for team and client.

Knowledge sharing

Internal generative-AI session for a team of around 15 people.

Tool

F3M Assessment ready for demos and multi-domain evolution.

SELECTED EVIDENCE

From complex context to a *real deliverable*

Two cases that capture a way of working: functional, technical and focused on actual use.

F3M Assessment Accelerator

INTERNAL INITIATIVE

CHALLENGE	Turn a finance maturity framework of 9 domains and 38 capabilities , scattered across spreadsheets, into an experience that could be navigated and explained clearly.
CONTRIBUTION	Central role in the functional interpretation, user experience and development , with the addition of four domains : navigation, radar charts, heatmap, gaps, priorities and initiatives linked to the diagnosis.
BUILD	Git and GitHub, deployment on GitHub Pages, shared persistence with Firebase and industrialisation of domain onboarding , so that adding a new one does not require rebuilding the tool.
SCOPE	Multi-domain architecture covering FP&A, controlling, transactional processes and business finance; executive presentation, guided demo and use in client conversations .

Planning and controlling on Oracle EPM Cloud

CLIENT PROJECT

CONTEXT	One of Spain's ten largest business groups by revenue, with long-range planning scenarios, budget, forecast and actuals covering margins, prices, variances, profitability, R&D and investments.
CONTRIBUTION	I worked on the functional design of the dimensional model and the calculation rules , on the coordination of integrations through ODI, FDMEE, Data Exchange and EPM Automate, and on data validation.
DIAGNOSIS	Tracing rules, periods, scenarios, rejected records and mappings to pinpoint where a load or transformation stops producing the expected result.

CAPABILITIES

Finance transformation

Planning, budget, forecast, actuals, variances, profitability, R&D and investments.

Oracle EPM and finance

Oracle EPM Cloud, Hyperion Planning, Essbase, Smart View, EPBCS, FDMEE and OCI.

Integration and data

ODI, Data Exchange, EPM Automate, SAP S/4HANA, data loads, mappings and SQL.

Development and deployment

JavaScript, HTML, CSS, Git, GitHub Pages, Firebase and data visualisation.

Applied AI

Generative AI, prompt engineering, agents and work assistants.

Method and consulting

Business analysis, Agile, Scrum, ITIL 4, Lean Six Sigma and executive presentations.

SELECTED CERTIFICATIONS

Artificial intelligence - 20 Oracle (6), Deloitte (4), Google (4), Anthropic (3) and OpenAI (3).

Oracle Cloud - 10 Oracle Cloud EPM Data Integration Professional, Oracle Data Platform Certified Associate, OCI Foundations, AI Autonomous Database Professional and Guided Learning Administrator.

Management & consulting - 10 ITIL 4, predictive, agile and hybrid project management, Scrum, Lean Six Sigma, Business Analysis and Client Relationship Management.
